

Seal Inspection...

Seal Verification and Inspection Process:

- A seal inspection process should be implemented throughout the supply chain. The V.V.T.T. Seal Inspection Process is a good example of one:

V – View seal & container locking mechanisms.

V – Verify seal number for accuracy.

T – Tug on seal to make sure it is affixed properly.

T – Twist & Turn seal to make sure it does not unscrew.

Seal Inspection...

Seal Verification and Inspection Process:

- **T**ug on seal to make sure it is affixed properly. Seals that come apart must be reported to a Supervisor before opening the container. Human error might cause this to happen, or the container might have **contraband** inside!

Seal Inspection...

Seal Verification and Inspection Process:

- **T**wist & Turn seal to make sure it does not come off. Seals are threaded, so they can be unscrewed. These altered seals are reusable throughout the supply chain for multiple attacks!
